PROFESSIONAL EXPERIENCE

- **Wild Card Ventures LLC – Technology Strategist.** 2/2009-Current: Provide the vision and champion quality end-to-end technical services and products. Responsible for writing technical specifications, user stories, maintaining the product backlogs, coordinating sprints iterations using Agile, Lean and the Kaizen methodologies to effectively managing resources and deliver products to customer specifications, on budget and on time.
- **Symphony Teleca - Mobile Development Team Lead.** 4/2011-12/2011: Coordinated the Flash design team in an Agile project environment with daily 15 minute stand-up meetings. Worked through user stories and product backlogs with product owners. Updates were continually integrated into the product through source control and automated builds. We had continuous testing and highly visible progress indicators and information radiators.
- **Bally Technology - Embedded Touch Screen Developer** 1/2011-3/2011: Integrated the Bally Display Manager (DM) technology into the IGT GameKings. The project demonstrated the backward compatibility of the Bally DM technology and was delivered to spec on time.
- **IGT (International Gaming Technology) - New Products Development.** 10/2010-1/2011: Produced a new user interface for the Casinolink eSmib and Service Window products for the 2010 G2E show and the 2011 ICE show. Products were delivered to specifications on time.
- **Caesars Entertainment Inc (Object Systems Group) - Software Developer.** 1/2010-10/2010: Ported the Total Rewards customer facing touch screen application to run on multiple manufacturers' hardware. The goal of our project was to modify the existing application to run on both the NexGen and iView 3.0 platforms. Wrote a socket server, documented all G2S messaging and delivered to customer specs, on budget and on time.
- **Lexus (The Cobalt Group) - Flash Developer.** 5/2009-8/2009: Produced the interactive

showcase for Lexus dealerships. Vehicle details, pricing and images used for animation are loaded at runtime based on files. Lead the Flash development effort for the Lexus redesign.

- **MSN.com (Insight Global) - Senior Flash Developer.** 6/2006-12/2008: Created premier rich internet applications using Flash, video and dynamic content for MSN's enterprise partners.
- **Expedia.com (Insight Global) - Web Developer.** 6/2006-11-2008: Built the Ski Store Flash application using XML to populate affiliated resorts, Insider Select, Top Deals Banners.
- **Microsoft Research (Insight Global) - UI Developer.** 3/2007-12/2007: Created the web interface for Microsoft Robotics using XML, Web Services, AJAX, XSLT, CSS, HTML and JavaScript for REST services offering coordinating concurrent processes via http.
- **T-Mobile (Publicis Seattle) - Flash Developer.** 2/2006-9/2006: Created the Face Icon Maker touch screen applications used to create myFav icons sent to T-Mobile user's phones.

RECOMMENDATIONS

LinkedIn Profile: <http://www.linkedin.com/pub/jeff-jones-pmi-acp/1/499/789>

"Jeff combines strong design and development expertise with excellent project management skills, and most importantly, the ability to lead by example, and successfully drive a team to meet tough deadlines. Based on these skills, he's someone I'd want to work with any time, as I know I can count on his expertise, leadership and strong work ethic." ~ *David Witt Sr. UX Developer Symphony Teleca 7/13/2012*

"Jeff Jones was a pleasure to work with during my tenure at Caesars. He was the lead architect, designer and developer of many high profile projects; one of those projects being Prism (real time marketing at the slot). His knowledge and skill-set of Web/Flash development along with his motivation will lead any company's vision to reality. Not only was he able to deliver his projects on time, but he also introduced innovative ideas to the table, which resulted in new revenue for the company. I recommend Jeff." ~ *Billy Cao Senior Programmer Analyst Caesars Entertainment Corporation 3/9/2012*

"Jeff has the experience to build an application from end to end--database to the rich GUI. He came into a project that used a proprietary messaging format on top of a proprietary network, and older languages. Jeff was able to split the code base to apply fixes to production while updating a separate branch to a more recent version while pointing out where improvements could be made for usability, testing, and supportability in both. He's great to work with and will teach you as much as you want to know, as well as learn as much as you can teach him." ~ *Darby Grady QA Engineer Cantor Gaming 2/15/2012*

"Jeff worked on several contracts for us where he did outstanding work. I would highly recommend Jeff for any projects that you might have. He is detail oriented and always provides outstanding work." ~ *Trey Gundrum Director of Operations at Insight Global 4/12/2012*

EDUCATION and INTERESTS

- **Bachelor's Degree in Information Systems & Accounting; University of Idaho 2000**
- **Technical Certifications:** PMI-ACP (Agile Certified Practitioner)
- **Interest:** Hiking, travel photography, video editing, web development, motorcycles and snowboarding.
